**REQUEST FOR  
RECONSIDERATION**

Commissioner for Trademarks  
P.O. Box 1451  
Alexandria, VA 22313-1451

Dear Commissioner:

In response to the final Office Action of June 6, 2014, Applicant requests that the Examining Attorney reconsider the partial refusal to register under Section 2(d) of the Trademark Act, 15 U.S.C. § 1052(d), and withdraw the refusal in light of the following remarks and attached evidence, in addition to the arguments and evidence presented in Applicant's response of May 5, 2014 ("First Office Action Response").

**THE MARK SHOULD BE PASSED TO REGISTRATION**

**I. THERE IS NO LIKELIHOOD OF CONFUSION WITH THE CITED REGISTRATION**

The Examining Attorney has issued a final partial refusal to register Applicant's mark INSURGENT in Class 9 for the specific goods, "computer games, namely computer game cartridges, cassettes, tapes, discs, programs and software, downloadable widget program for use in authoring, downloading, transmitting, receiving, editing, extracting, encoding, decoding, playing, storing, and organizing electronic games, and electronic games downloadable via the

**12-08-2014**

internet and mobile devices and video games, namely video game cartridges, discs and software” under Section 2(d) of the Trademark Act on the grounds of a likelihood of confusion with INSURGENCY, Reg. No. 4,392,625, for computer game software for personal computers and home video game consoles in International Class 9 owned by Jeremy A. Blum (“Cited Mark”).

The Examining Attorney contends that Applicant’s mark and the Cited Mark are similar in appearance, sound, meaning, connotation or commercial impression; Applicant’s goods and Registrant’s goods are related such that potential purchasers are likely to erroneously believe that Applicant’s goods and Registrant’s goods emanate from a common source; and Applicant’s and Registrant’s trade channels are presumed to be the same in the absence of any limitations in the respective identifications of goods and services. Applicant respectfully disagrees with the Examining Attorney’s conclusion and requests reconsideration of the final refusal to register.

**A. The Marks are Dissimilar in Appearance, Sound, Connotation and Commercial Impression**

The first inquiry in testing for likelihood of confusion is the similarity or dissimilarity of the marks in their entirety, in sight, sound, connotation and commercial impression. *See DuPont*, 476 F.2d at 1361. The Examining Attorney has erroneously concluded that the marks are similar because the Examining Attorney has failed to properly appreciate the differences in appearance, sound, connotation and commercial impression between Applicant’s mark and the Cited Mark.

Applicant incorporates the arguments from the First Office Action Response distinguishing the marks in appearance, connotation and commercial impression. Applicant reiterates that Applicant’s INSURGENT mark ends with the letter T while the Cited Mark ends with the different letters CY. Applicant’s mark also consists of three syllables while the Cited Mark consists of four syllables. More importantly, the Examining Attorney has erroneously

concluded that the connotation and commercial impression of the respective marks are similar because the meanings of the two words are the same. The Examining Attorney has only focused on the generic dictionary definitions of the words, rather than the meanings imbued through marketing and popular media.

As previously noted, Applicant is the producer and distributor behind the global phenomenon motion picture film *Divergent* and to-be-released films *Insurgent* and *Allegiant Part One* and *Allegiant Part Two* (collectively, the “*Divergent*” Motion Pictures”). The films are based on the enormously successful young adult science fiction book trilogy written by the author Veronica Roth, which have the same titles (“*Divergent* Series”). The *Divergent* Series is set place in a fictional dystopian post-apocalyptic Chicago, in which people are divided into factions based on human virtues. The books and films focus on the story of a young girl and her unique ability to fit into all factions.

Since the First Office Action Response, Applicant’s first film, *Divergent*, has garnered additional U.S. sales, namely \$150 million to date, and worldwide sales of \$288 million to date. See **Exhibit A**, which is a true and correct printout from the movie box office database *IMDB* tracking *Divergent* revenues as of December 2, 2014. Applicant’s second film, *Insurgent*, which is the basis of Applicant’s mark INSURGENT in the present application, is projected to gross between \$350 to \$400 million worldwide. See **Exhibit B**, which is a true and correct article titled “Lionsgate Expects ‘Divergent’ Sequel ‘Insurgent’ to Hit \$450 Million or More” from the entertainment magazine *Variety* dated May 30, 2014.

Applicant’s INSURGENT mark conveys a connotation and commercial impression uniquely associated with the *Insurgent* novel and the *Insurgent* motion picture, as well as the overall *Divergent* trilogy.

Registrant's mark INSURGENCY ends in CY rather than T and thus does not have the same association with the *Divergent* trilogy (DIVERGENT<sub>T</sub>, INSURGENT<sub>T</sub>, ALLEGIANT<sub>T</sub>) that Applicant's mark INSURGENT does. Registrant's video game under Registrant's INSURGENCY<sub>CY</sub> mark is associated with multi-player infantry warfare game involving the U.S. Marines and terrorists, set in Iraq and Afghanistan. See, **Exhibit C**, which are copies of Registrant's specimens submitted with Registrant's application to register the Cited Mark.

Applicant's mark and the Cited Mark, therefore, are quite different in connotation and commercial impression.

**B. The Goods Offered Under the Respective Marks Are Not Marketed Such that a Mistaken Belief of Common Source Would Likely Arise**

The Examining Attorney also erroneously states that Applicant's and Registrant's goods are related because "they are all computer games and/or video games". (Final Office Action at 3.) Courts and the Board routinely hold however that there is no likelihood of confusion "if the goods or services in question are not related or marketed in such a way that they would be encountered by the same persons in situations that would create the incorrect assumption that they originate from the same source . . . ." TMEP § 1207.01(a)(i) (emphasis added) (citing *Shen Mfg. Co. v. Ritz Hotel Ltd.*, 393 F.3d 1238, 1244-45 (Fed. Cir. 2004) (cooking classes and kitchen textiles not related)).

The Examining Attorney only focuses on the fact that the Cited Registration and Applicant's application do not contain any restrictions in the channels of trade or the classes of consumers, but the marketplace reality clearly demonstrates that each party's respective goods are not "marketed in such a way that they would be encountered by the same persons in situations that would create the incorrect assumption that they originate from the same source". TMEP § 1207.01(a)(i).

First, an Internet search on search engine site Google for the term “Insurgent” only brings up hits for Applicant’s *Insurgent* film and not Registrant’s video game. See **Exhibit D**, which is a true and correct printout from Google for the first ten hits for “Insurgent”. Conversely, a Google search for the term “Insurgency” only brings up hits for Registrant’s video game and not Applicant’s film. See **Exhibit E**, which is a true and correct printout from Google for the first ten hits for “Insurgency”.

Applicant’s *Insurgent* film is due to be released in early 2015, but popular media is consistently reporting on all facets of the film, such as the cast of actors, the script, the trailer and other pertinent facts that fans are interested in. See **Exhibit F**, which are true and correct news printouts from the Yahoo Movie online database about Applicant’s *Insurgent* film and cast of actors, which includes such well known stars Naomi Watts, Kate Winslet and Daniel Dae Kim. See also **Exhibit G**, which is a true and correct article from the movie news site <cinemablend.com> titled “Divergent’s Jai Courtney Just Dropped A Massive Insurgent Spoiler...Because Why Not?” See also **Exhibit H**, which is a true and correct article from movie news website <screenrant.com> titled “‘Divergent’ Sequel ‘Insurgent’ Being Rewritten By Oscar-Winner Akiva Goldsman.” Applicant’s November 2014 release of the trailer for the *Insurgent* film was reported in various news media. See **Exhibits I-J**, which are true and correct printouts from <mtv.com> and <nydailynews.com> reporting on the trailer release. Applicant’s *Insurgent* film trailer has already been viewed more than four million times on the video website Youtube in the approximately two weeks it was uploaded. See **Exhibit K**, which is a true and correct printout on December 2, 2014 from Youtube for Applicant’s *Insurgent* trailer uploaded on November 12, 2014.

As previously stated in the First Office Action Response, Registrant's INSURGENCY mark carries none of the connotation and commercial impression of Applicant's INSURGENT mark because Registrant is not associated in any way with Applicant's films. Thus it is highly unlikely, if not impossible, that consumers would confuse Applicant's and Registrant's goods.

**C. Registrant's Consumers Will Not be Confused When Purchasing the Offered Goods**

Finally, Applicant reiterates that Registrant's customers are sophisticated video game players who are looking for the specific type of game, namely, a multiplayer tactical first person shooter game with an army combat theme set in Iraq and Afghanistan. They are quite unlikely to confuse Registrant's video game with Applicant's games associated with the *Divergent* trilogy of motion pictures, which focuses on the life of a young girl and which are set in a fictional dystopian Chicago. *See In re Digirad Corp.*, 45 USPQ2d 1841, 1843 (TTAB 1998) (threshold for confusion is much higher for careful, sophisticated, discriminating purchasers than for impulse purchasers, and there is always less likelihood of confusion if the purchase concerns an expensive product or is made after careful examination of the product).

Critic reviews and fan comments for Registrant's INSURGENCY video game consistently appear on websites focused on video games, computer games and other multi-player games, not movie sites or fan sites geared towards movies. *See Exhibit L*, which is a true and correct printout from the video game store site at <steampowered.com> reviewing Registrant's game; *see also Exhibit M*, which is a true and correct printout from the video game news site at <ign.com> reviewing Registrant's game; *see also Exhibit N*, which are true and correct printouts from the video game news site at <metacritic.com> posting critic and fan comments about Registrant's game. The target audience for Registrant's INSURGENCY game are completely

different from that of Applicant's INSURGENT goods associated with Applicant's *Insurgent* film.

In summary, these purchasing conditions weigh in favor of a finding that there is no likelihood of confusion between Applicant's mark and the Cited Mark.

## II. CONCLUSION

For the foregoing reasons, Applicant has demonstrated that no likelihood of confusion exists between Applicant's mark and the Cited Mark. Accordingly, Applicant respectfully requests that the Examining Attorney withdraw the refusal to register under Section 2(d) of the Trademark Act and approve Applicant's mark for publication.

Applicant has filed a Notice of Appeal to the Trademark Trial and Appeal Board herewith.

Respectfully submitted,

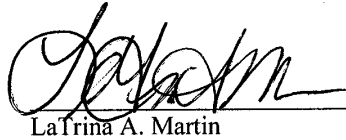

Dated: December 5, 2014

## *Lionsgate Expects 'Divergent' Sequel 'Insurgent' to Hit \$350 Million or More*

**Dave McNary** (<http://variety.com/author/dave-mcnary/>)

Film Reporter

**@Variety DMcNary** (<http://twitter.com/@Variety DMcNary>)

Sounding bullish on the outlook for the "Divergent" franchise, [Lionsgate](http://variety.com/t/lionsgate/) (<http://variety.com/t/lionsgate/>) CEO Jon Feltheimer has forecasted that the second film, "Insurgent," should gross between \$350 million to \$400 million worldwide.

That would represent an increase of 27% to 40% above the estimated final gross of around \$275 million expected for "Divergent," starring [Shailene Woodley](http://variety.com/t/shailene-woodley/) (<http://variety.com/t/shailene-woodley/>) and Theo James. "Divergent" opened March 21 and has grossed \$266 million.

"Insurgent," which went into production last week, will open March 20 with Lionsgate splitting "Allegiant" — the last book in Veronica Roth's dystopian trilogy — into two films that will open in 2016 and 2017.

Feltheimer said the "Divergent" franchise will be making significant contributions to Lionsgate's profits into 2018. He noted that Roth's books have sold 20 million copies worldwide, a pace that he asserted is steeper than the trajectory at this point in the franchise than for the books in Suzanne Collins' "[Hunger Games](http://variety.com/t/hunger-games/)" (<http://variety.com/t/hunger-games/>) trilogy.

The CEO also said he expects Woodley's "The Fault in Our Stars," a drama Fox will open June 6, will "enhance" her status.

Feltheimer made the disclosure during a conference call with analysts Friday, a day after [Lionsgate reported earnings that fell short](http://variety.com/2014/film/news/lionsgate-earnings-below-analyst-estimates-1201195936/#) (<http://variety.com/2014/film/news/lionsgate-earnings-below-analyst-estimates-1201195936/#>) of estimates — a departure from recent quarters.

The report, issued after the market closed, disappointed Wall Street and the stock opened sharply lower, falling 12% with a decline of \$3.40 to \$26.13 on the New York Stock Exchange.

For the fiscal year ended March 31, Lionsgate reported earnings of \$152 million, or \$1.11 per share, down 34%. Revenue declined 3% to \$2.63 billion with adjusted EBITDA of \$370.8 million.

Feltheimer said combined EBITDA for the next three fiscal years should come in between \$1.2 billion and \$1.3 billion. Annual revenues should reach \$3.25 billion in 2017, he added.

Feltheimer also disclosed he expects the company will increase its dividend payouts to shareholders.

The studio paid its second-ever quarterly dividend (<http://variety.com/2014/film/news/lionsgate-sets-second-dividend-ahead-of-divergent-launch-1201136299/#>) of 5 cents a share on Friday to shareholders of record on March 31. "It's our intention to increase the dividend on a yearly basis," Feltheimer said.

Feltheimer also touted Lionsgate's TV business, comparing the upcoming "Manhattan" series to "Mad Men" and "Orange Is the New Black." And he noted that "Orange" and "Nashville" have been renewed third seasons, putting them on track for syndication sales, and predicted that annual operating profit for Lionsgate TV will hit \$100 million within "a couple of years."

Lionsgate reported Thursday that its TV revenue for fiscal 2014 jumped 18% to \$447 million.

The CEO also said Lionsgate has continued to repurchase shares. The company reported Thursday that since the December increase in its share repurchase authorization to \$300 million, it has repurchased a total of 3.4 million common shares for an aggregate price of \$90.5 million.

## 'Insurgent' Started Shooting Today, So Get Off Their Backs!

Josh Wolk  
Executive Editor  
Entertainment May 27, 2014

F

Just two months after *Divergent* opened, Lionsgate announced today that the cast and crew of the sequel, *Insurgent*, just started production in Atlanta. (Heaven forbid Shailene Woodley get a moment to breathe while in the midst of her exhaustive multi-month publicity marathon for *The Fault in Our Stars*, which opens on June 6. They'll probably make her call morning-zoo radio DJs to hype *TFIOS* in the middle of *Insurgent* stunts.) *Insurgent* has a new director, with Robert Schwentke (*R.I.P.D.*, *RED*) taking over for *Divergent*'s Neil Burger this time, much as *The Hunger Games* swapped its directors after its first go-round.

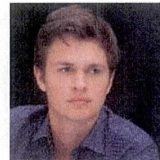

The sequel will come out on March 20, 2015, nearly a year to the day after *Divergent*. Knocking out the installments of YA franchises on an annual schedule has become *de rigeur*. *Harry Potter*, *Twilight*, *Hunger Games* — now nobody involved can rest until a series has been wrung dry. Remember when we had to wait three years between *Star Wars* movies? If you asked people to have that kind of patience today, they'd riot in the streets! The very fact that J.J. Abrams isn't shooting an entire trilogy at once probably has fanboys tapping their feet in impatience.

## Naomi Watts Joining Shailene Woodley in 'Insurgent,' 'Allegiant'

Variety  
June 4, 2014

By Dave McNary

Naomi Watts is in final negotiations to join Lionsgate's "Insurgent" and its two "Allegiant" sequels.

She will portray Evelyn, a leader of the Factionless in the three films, based on Veronica Roth's "Divergent" trilogy.

Shooting began recently in Atlanta on "Insurgent," with Shailene Woodley, Theo James, Ansel Elgort, Kate Winslet and Miles Teller reprising their roles from "Divergent." Robert Schwentke is directing "Insurgent" from a screenplay by Brian Koppelman and Akiva Goldsman.

Doug Wick and Lucy Fisher are producing through their Red Wagon banner with Pouya Shahbazian.

Lionsgate CEO Jon Feltheimer forecasted last week that "Insurgent" will gross between \$350 million and \$400 million worldwide. That would represent an increase of 27% to 40% above the estimated final gross of around \$275 million expected for "Divergent," which opened March 21 and has grossed \$266 million thus far.

"Insurgent" will open March 20 with Lionsgate splitting "Allegiant" into two films that will open in 2016 and 2017.

Watts will be seen next in Alejandro Gonzalez Inarritu's "Birdman," The Weinstein Co.'s "St. Vincent" and Noah Baumbach's "While We're Young." She is repped by CAA and Untitled.

## 'Parenthood' Actress Rosa Salazar Joins 'Insurgent' (Exclusive)

The Hollywood Reporter  
June 9, 2014

Summit's YA sequel starring Shailene Woodley is currently shooting in Atlanta.

By Rebecca Ford

*Parenthood* actress **Rosa Salazar** has joined YA sequel *Insurgent* as Lynn.

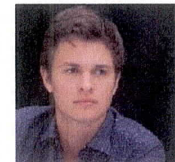

Summit's follow-up to *Divergent* sees the return of **Shailene Woodley** and **Theo James** as citizens in a world where people are divided into groups (aka factions) based on certain values. **Robert Schwentke** is directing the sequel, which is currently shooting in Atlanta, from a script by **Brian Duffield** and **Akiva Goldsman**.

[PHOTOS: 'Divergent' Star Shailene Woodley: Outtakes From THR's Exclusive Photo Shoots](#)

The sequel, set for release on March 20, 2015, sees most of the cast returning including **Miles Teller**, **Ansel Elgort**, **Kate Winslet**, **Jai Courtney** and **Zoe Kravitz**. New additions include **Octavia Spencer**, who will play Johanna, [Suki Waterhouse](#), **Naomi Watts**, **Daniel Dae Kim** and **Jonny Weston**.

The story follows Tris (Woodley) and Four (James), who are now fugitives on the run, as they must find out what Tris's family sacrificed their lives to protect, and why the Erudite leaders will do anything to stop them.

Lynn is one of the Dauntless-born initiates, and, in **Veronica Roth's** books, she's described as beautiful and sporting a shaved head. She's good friends with Uriah and Marlene (Waterhouse) in the books.

Salazar played Zoe DeHaven on NBC drama series *Parenthood*, and also appeared on the first season of *American Horror Story*. Her film credits include voicing a character in *Epic* and appearing in the 2014 film *Jamesy Boy*. She'll be seen in the upcoming films *Search Party*, *Night Owls*, *Submerged* and *May the Best Man Win*. She's repped by Paradigm, Seven Summits Pictures & Management and Nelson Davis Wetzstein.

## Divergent's Jai Courtney Just Dropped A Massive Insurgent Spoiler... Because Why Not?

BY KELLY WEST 2 MONTHS AGO 3 COMMENTS

What's the rule about spoilers if the movie is based on a book? That's probably debatable, especially when we consider that most adaptations take some liberties with the source material, which leaves some wiggle room for a possible twist or two. That's apparently not going to be the case with Jai Courtney's *Divergent* character Eric. The actor was asked about his role in the upcoming *Divergent* sequel, *Insurgent* and he answered without hesitation.

*It's at this point that we'll offer our own spoiler warning. This article reveals a major plot point from Insurgent, both the book and the film. So if you haven't read Veronica Roth's book but plan to see the sequel, or you have read the book but don't want to know anything about the feature adaptation, read no further!*

Super Hero Hype was cautious about the way they phrased their question to Jai Courtney, asking him if "the arc of Eric" will "coincide with the arc in the books." It's a general enough question, and Courtney wasted no time getting to the point.

As in, "Do I die?" Yes. Yeah there's no spoilers there 'cause it was already written in a different medium, so I'm happy to say that. It's cool, we just wrapped on that the other week.

Ok, time out. Is it really not a spoiler, just because the character dies in the book? I guess that's debatable. After all, who's to say they weren't going to change Eric's arc for the film somehow and maybe keep him around through the two-part *Allegiant* adaptation? But on the other hand, having read the book and knowing that Eric dies, it's not like this piece of information is a huge surprise. It's just confirmation really, and at the very least, it allows Jai Courtney to speak openly about his character.

So, ok. No major harm. (But I reserve the right to feel differently about book-to-

screen spoilers related to the lead characters, particularly as it relates to the final two movies. If they're going to make any drastic changes to *Allegiant*, I don't want to know until I see it.)

Eric is a supporting character in this dystopian young adult story. He was introduced in *Divergent* as one of the Dauntless faction leaders, where Shailene Woodley's Tris is an initiate. Unlike Theo James' Four, whom Tris eventually warms up to, Eric ends up living up to the dark side he presents from the start as the first part of the story draws to a close.

Courtney talked to SHH about being able to come back to do the second film, which is something he's never gotten to do before. And he seems pretty happy with the direction Neil Burger took with his character in *Divergent*.

I didn't realize how much I enjoyed being that cold and nasty. It's good because he's so dead. I wrestled with that originally, but that was a testament to Neil's vision. You can throw different shades in there, but I was glad he pushed me to create the character the way he did 'cause it worked the second time around. It's that subtle material, it's quite fun to do stuff like that rather than make it so obvious.

It's definitely a different side of Jai Courtney than what we saw of him as the relatively gregarious gladiator Varro in *Spartacus: Blood and Sand*, or Jack McClane in *A Good Day to Die Hard*. From Courtney's comments, it sounds like *Insurgent* director Robert Schwentke is running with Neil Burger's vision, at least as it relates to Eric's subtle "cold and nasty" side. And it also sounds like Jai Courtney is happier with the role he got to play in *Divergent* than Miles Teller is. So that's something.

*Insurgent* arrives in theaters March 20, 2015.

The best spoiler would be that he was fired. Guy's a brick of an actor. He's the Sam Worthington of 2012-2015. Assume he will be less popular in a year or two as producers realize audiences are not embracing him (like Worthington).

## 'Divergent' Sequel 'Insurgent' Being Rewritten by Oscar-Winner Akiva Goldsman

Published 10 months ago by [Robert Yaniz Jr.](#)

More

Ever since Warner Bros. and New Line (now a subsidiary of Warner) struck gold with the *Harry Potter* and *The Lord of the Rings* film franchises, respectively, in 2001, it seems like every other studio has been scrambling to develop its own page-to-screen adaptations of popular fantasy/sci-fi book series. Films like *The Golden Compass* and *Eragon* stalled after one film, while other series like *The Chronicles of Narnia* and the *Percy Jackson* films have managed to continue moving forward with modest success.

In recent years, however, only the *Twilight* and *The Hunger Games* series have become bonafide box office phenomenons, and this spring, Summit Entertainment – the studio behind the recently-completed *Twilight* saga – will try again to tap into a similar audience with the March release of *Divergent*, based on the first in a trilogy of novels by Veronica Roth. Now it looks like the studio is bringing in a big name for the in-development sequel.

In Defense Of The New 'Star Wars' Lightsaber

5 Things You Missed From The New 'Star Wars' Trailer

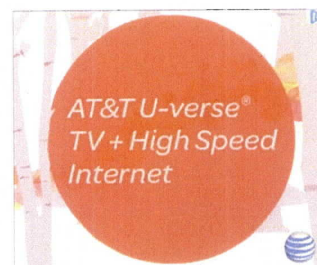

The Easter Egg You Probably Missed in the 'Star Wars' Teaser

Why The New 'Star Wars' Lightsaber Actually Makes Sense

According to *THR*, Oscar-winning screenwriter Akiva Goldsman (*Winter's Tale*) has signed on to work on the script for *Insurgent*, the middle chapter in the *Divergent* trilogy. Evan Daugherty (*Snow White and the Huntsman*) and Vanessa Taylor

Better Call Saul (Clip)

(*Game of Thrones*) wrote the first installment, while Brian Duffield (*Jane Got a Gun*) wrote the initial script draft for the second movie.

The addition of Goldsman is an interesting move for the studio, as it looks to shape *Insurgent*. We already know that *Divergent* director Neil Burger will not return for the sequel, and while the studio is still on the search for a replacement, bringing on a writer like Goldsman could indicate that Summit is looking to take the *Hunger Games* approach to this franchise. That film's sequel, *The Hunger Games: Catching Fire*, took the departure of director Gary Ross as an opportunity to bring in a new director and writers, resulting in what is generally considered a superior film ([read our review](#)).

Goldsman certainly brings a wealth of experience to the project. In addition to his Oscar win for *A Beautiful Mind*, his filmography consists of hits like *The Da Vinci Code* and *I Am Legend*. However, the fact that he is also credited with the scripts for both *Batman Forever* and the much-loathed *Batman and Robin* is a hard reminder that the *Divergent* sequel might not turn out so well.

That being said, Goldsman has proven that he is capable of solid genre work with *I, Robot* and numerous episodes of *Fringe*. So there is every possibility that he could bring great things to the *Divergent* franchise, provided that the first film is the next *Hunger Games* and not the next *Ender's Game* at the box office.

Do you think that Goldsman's involvement is a good sign, or is the *Divergent* franchise in trouble already? Let us know in the comments section below.

*Divergent* hits theaters on March 21, 2014, followed by sequels *Insurgent* and *Allegiant* on March 20, 2015 and March 18th, 2016, respectively.

The first book was awesome the movie made me read the series the next 2 books are written completely different and are long drawn out, boring, and a horrible ending, I will not be watching these next two movies and I suggest rewriting the last 2 books to make better movie loosely bases on the events of the last two books cuz they suck

In my opinion a new director is bad news. I think that this new guy will change everything. It should be like the book and he is going to mess it up. But then again it might turn out better. I just think Neil Burger is the better choice.

If I had known how the trilogy would end I would not have read the books. The ending was logical but was it necessary? It seemed like taking the easy road. Could a little creativity have provided a more satisfactory ending? Very disappointing.

Tris is back, and she brought you a teaser-trailer.

by **shaunna murphy** (<http://www.mtv.com/news/author/murphsha/>) 11/12/2014

With "The Divergent Series: Insurgent" (<http://www.mtv.com/news/1974380/shailene-woodley-divergent-sequel-insurgent/>) premiere now only four months away, fans have been itching for a peek at what Tris (Shailene Woodley), Four (Theo James), Caleb (Ansel Elgort) (<http://www.mtv.com/news/1977995/ansel-elgort-insurgent-poster/>) and the gang has in store now that their "peaceful" dystopian Chicago community has been shattered by Jeanine Matthews (Kate Winslet) and her evil band of Erudite bad guys.

Well, consider that itch officially scratched, because the brand new teaser-trailer for "Insurgent" is live as of Wednesday, November 12. Now pardon our candor, but we need some time to officially freak the eff out/clear our calendars for March 20, 2015.

**shaunna murphy** (<http://www.mtv.com/news/author/murphsha/>)

A real go-getter.

"'Insurgent' has so much more action than 'Divergent' did and the action scenes are, like, seven-minute long sequences," Woodley told the Daily News last month.

The actress, who turns 23 on Saturday, managed to deftly avoid spoilers, but did describe dangling from a great height in a harness and surrounded by green screens for the scene.

Jai Courtney muscled his way from Australia to Hollywood

"Then they compiled the shots and showed me on the screen what it would look like and I remember being like, 'A, technology is f--- crazy and B, it's so fun,'" she said. "I felt like Spider-Man."

"Insurgent," the second installment of the four-part series based on Veronica Roth's dystopian young adult novels, also sees the return of Theo James, Ansel Elgort, Jai Courtney and Kate Winslet.

Wait so if you don't really watch them, why did you watch the trailer? For "inspection"? I didn't mind it as much as some people seem to think it was a "teen angsty movie" if you don't really like them.

It does suck that the main character dies but hey it makes it more real. Isn't that the point that even the main character isn't infallible? Many writers make their main people too perfect.

Game is so good that it mysteriously popped up in my library without me even noticing it until now. And it came with a stunning 25 hours playtime, which is an even bigger mystery.

Great game. Recommend getting it if you liked Battlefield or Arma. Maybe a stupid comparison, but still, it's worth getting for the realistic military experience. Or just go join the military, what do I care.

As I run down the sandy street I hear insurgents talking, they are speaking some arabic language I don't know. The rest of my squad follows. They all get ready to attack as they also hear the insurgents around the corner. As we move in and attack one of my brothers in arms, Johnny, gets hit in the gut and falls backwards with a 'THUMP'. One of my friends in my squad yells "SNIPER!!!" As the shot went into Johnnys gut, the Insurgents notice the shot and head in my squads direction. Under fire, I get my squad into order. I yell " TAKING FIRE!!! CONTACT, IN FRONT, 30 METERS" They all take action and return fire to the enemy while in cover. I sadly couldn't do anything for Johnny as he was already coughing up blood and shivering in pain. And there was no medic even close to our

A very good tactical shooter, well made mod, I think Insurgency 2 it gonna be flawless. Even though it's old you should. Give it a try. Even though the servers are now kind of ruined, but just give it a try.

While it the mod suffers from a lack of servers it is amazing fun.  
It's basically arma minus the giant maps which makes it incredibly realistic which is technically the whole goal to the mod.  
well cooperation and teamwork is key.  
But i basically ran out of anything to say but if you have enough to spare get the Full Version simply called "Insurgency" It's not much it should be about \$15.00 which is a little too much considering the content you get, but im sure updates will fix that.

Amazing, similar to Flash Point: Dragon Rising with realism, but has teamwork unlike any game, this game forces you to make plans and to put plans into action, to succeed, and to fail, run around. This game honestly is amazing the free version and the paid version. 9.5/10 only problem glitches, but the creators are non-professional programmers, so amazing job.

Good game shows realistic problem in real combat, Nomarly cant always see where the enemy is coming or shooting. Then what it comes down to a gamble of chance where his firing postion is but i never treated this game this way because its so fun to just go guns blazing and shoot and throw grenades even though you die very quickly due to very good shoots in this game many good veteran players. Good community, 9/ 10 The big thing it needs fixed is just really more options for combat like IED it is of course a INSURGENCY and all you get is the simple bombs and not the hard to tell weather its a bomb or not IED's Need way more feel in this game if it ever wants to be even more realistic. That and more guns please :D!!

It could be a good game but:

1. Only one server available. And that server has only 5 people playing on it.
2. The standalone Insurgency is way better than this mod. It is worth every single cent.
3. With no bullet drop or the likes, sniping is REALLY EASY.

I would have played more if it wasn't such a dead game.

HOWEVER, this game is still better than that piece of crap named "Takedown: Red Sabre".

♥♥♥♥♥ting your pants while lying in cover, when two snipers are just waiting for your head to stick out of cover, and a machinegunner with M249 suppresses you with his nearly infinite ammo. Bullets crack and whizz around you and nealy every move will end your life...  
That's really interesting, especially, when you have some friend on Skype, and you can scream and ♥♥♥♥♥ your pants together.

## Insurgency Review

Craig Pearson

### Think before you shoot.

Reviewed on PC

→ January 28, 2014 Insurgency is smartly camped on a spawn point between two of the better online tactical shooters: [Counter-Strike](#) and [Red Orchestra](#). Slower and more open than the former, but on a smaller scale (with more concentrated action) than the latter, it's a great midway point that gives you more to think about during the action than simply shooting the other team, but also keeps its pace moving quickly enough that matches don't turn into 45-minute slogs.

Trailer

As you'd imagine with a game set in Iraq, Syria, and Afghanistan, the soundtrack is the crisp snap of modern weaponry. Developer New World Interactive has done a good job with those weapons: you don't just pick a class in Insurgency; after selecting a from the locals or the peacekeepers/foreign devils, picking a class and joining a squad, then you tweak your loadout through an impressively flexible system. You can snap off the optics and spend those supply points on an under-barrel grip and suppressor, making the rifle more controllable and quiet for sneaky close-quarters combat, or you could boost the optics and add weight to the barrel, creating a decent long-range rifle out of an M16A4. That spread of numbers extends to the rest of your equipment, so you could sacrifice a side arm and grab more grenades, creating intriguing little sub-classes that keeps both you and the enemy on your toes. It's a good system, yet there's a huge and obvious flaw: you can't save your loadouts. It's incredibly satisfying to tweak your kit, but doing so each time you play is really clumsy.

Death will come from dark corners, through tiny gaps, fired by unseen people. But that's okay. Insurgency's a slow game, and it pushes you to aspire to join those hidden

Insurgency is a primarily multiplayer FPS (First Person Shooter) with a gameplay style best characterized as high speed tactical.

Games that love guns:

killers. Of the many modes and maps available (five and 12, respectively, which are mostly a set up for different territorial-control modes), most have a nice mix of open areas leading to buildings and back alleys. Thanks to a heavy emphasis on territorial control, there's a lot of movement, so I was never quite comfortable in any one position. I never found a corner in any of them that can't be flanked or sniped, which is smart level design that works to keep you edgy.

Though there is one huge flaw in the gunplay as well: headshots results in instant death, but the weakness of ankles and elbows also puts you in a lot of danger. I've killed a lot of people with a burst of fire aimed at a heel poking out from behind cover. Dying because you took a hit to the ankle almost literally shoots Insurgency's real-world tactical vibe in the foot.

It's a strange design choice, because *Insurgency* otherwise gets a lot right: scoping raises your body slightly, and a lot of the cover has been designed to take into account that little adjustment, so you can hide and pop up just above the cover just when you're firing. You can adjust your mouse sensitivity for when you're zoomed in, enabling for twitch responses zoomed out, and slower aiming when you're iron-sighting or scoping. You can even add a little boost to your zoom by holding shift when you're not moving. You're not just aiming a crosshair, but balancing all those little tweaks on the fly. It's not quite *Arma III*-level control, but it doesn't need to be. It's a pleasant layer of thought on top of the usual mouse-clickery.

A well-laid-out floating UI helps to make sense of some complex game modes. My favourite is Search & Destroy, where the attackers are informed of potential positions, but there are more markers than real caches. Control points are used here to control your team's respawn, so you need to be in immediate and total control or you risk being overwhelmed by a more dominant enemy. You can easily follow friends with tracking diamonds floating on the screen, showing each player's position. Cache markers do the same for objectives. Both are subtle and unobtrusive, and make following the flow of the fight an easy task. In turn, that knowledge helps team play emerge without feeling forced. Perhaps I was just lucky in my choice of servers (or perhaps the community is so tiny that the only people playing are pros) but people I didn't talk to or order around knew exactly where to be, and by paying attention you'll start to recognise moments where suppressing fire is needed, or when it's best to toss a smoke grenade to mask a control point from the enemy or AI.

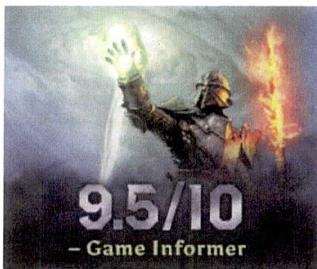

Oh yeah: the AI. *Insurgency* has a co-op mode where you clear the level of competent and sometimes-vicious bots, which is good practice. To their credit, I learned a fair bit about the art of concealing myself as I was playing against the automatons.

IGN Plays

As I mentioned before, a lot of the map design has been measured to take into account how you use cover. That means the more successful spaces are the urban areas, where entire games play out like those final, tense moments of a Counter-Strike match. I particularly enjoy District, where the corners are terrifying and even boarded-up windows can be knocked out and shot through. Here, and in most of the other maps, running is only an option if you're making a dash across an open area; the rest of the time you'll want to be bent double, sneaking, even crawling. Less exciting are the mountainous levels, where the clean lines give way to rolling terrain, which makes getting a grip of the angles a lot tougher. There's also one – Heights – that has a hideous amount of bloom. It's blindingly ugly, though it's in the minority. Most are great places to spend 10 minutes of your time.

### The Verdict

It's impressive how "uncool" [Insurgency](#) is, in that it ignores the modern shooter trends. It's slow, and methodical, and there isn't a grindable unlock or weapon crate to be found. It attempts to make you think about every step you take and every slight weapon tweak, but the odd hitboxes and frustrating lack of saved loadouts undermines some of the good work.

I just made an account on meta critic just to tell you how awesome this game is. Hardcore-Realism-Teamwork are the three aspects of this game. If you are looking into such experience dont hesitate just go for it. CoD-BF and other fps are just time-wasters in front of this. There is lack of community atm though..I hope this is just a temporary state and people who loves fps give more... [Expand](#)

Insurgency is a hard core first person shooter at it's finest. The game strips you of most conventional shooter mechanics such as a cross hair and simply says survive. The game modes and maps in Insurgency are well varied and very entertaining and challenging. While there isn't much progression to speak of, Insurgency entices you in not with rewards for doing good but rather the feeling of... [Expand](#)

It is very difficult to put down in words what makes INSURGENCY so great, and once you start to try to list all those smaller things that add up to the greatness you are afraid that you will forget so many things leaving the reader with an inaccurate description of the game.

Most games are just games or just experiences. INSURGENCY is a game and an experience at the same time.

I put around 250 hours into the game so far. I started back in the early access in March of 2013. The game has progressed into the best shooter I have ever played. It makes me keep coming back for more. This is a hardcore shooter that has filled the void that other modern shooters haven't been able to fill.

This game is a realistic shooter with team based combat like in Counter Strike, and realistic movement and gun handling similar to arma. The graphics are nice but nothing special and the game itself runs smoothly. Combat is very skill based, players used to games like call of duty will find it very unforgiving. The current player base is small but quickly growing with mature supportive players.

Fantastic game and my new favorite FPS. I haven't played BF4 or CS:GO since I bought it. It could use a few updates (ability to save loadouts for example) but as far as gameplay, teamplay, and overall fluidity go, it's a 10/10.

Coming from Titanfall, CoD, and BF this is much more refreshing. I'm just tired of playing the same games repackaged with a new name every year. This takes me back to early Counter Strike and CoD days. It's more team oriented to win, and it just gives you that feeling of playing a hardcore shooter. It doesn't have multimillion dollar production value, or a lot of trumped up menus, and... **Expand**

Finally a developer that listens and interacts with the community. Dedicated servers. Map tools and built on the Source engine so modding is supported as well. Game play is challenging but not frustrating. The Coop mode is exceptionally fun with a group of friends.

Maybe not as graphically intense as the S60 games but this allows PC players with lower end machines to play and... [Expand ▼](#)

Insurgency is great game that doesn't follow current FPS trend. It pretty much like highly realistic Counter Strike or modern era Red Orchestra game. It is fast pace(compare to other realistic shooter). It has great balance between realism and fun. It realistic to some minor which most of shooter in market ignored. And it reward teamwork very well. It also yell "F\*\*\* COD and BF!"

First of all, this game is for anyone who is looking for tactical-FPS. It's not easy at the start but, when you learn the game mechanics and get used to weapons it becomes a pure fun. If you looking for combination of Cod: MW maps, realism of Red orchestra and mechanics of Counter Strike this game is for you. It's a good mix of simulation and action.

This game is like any other war on terror type shooter, but is also very unique. And rather difficult, too.

The different game modes offer a very enticing and exciting game play that sets it apart from games such as Call of Duty. The game has a very good sense of realism in that there are no hit indicators to tell you where you've been shot from, it doesn't take many shots to kill ... [Expand ▼](#)

This is a great shooter, I honestly prefer it to the giants in the genre because it has a certain intensity that the big titles just don't have. This is mainly down to a realistic damage model, and the way the guns work. You have to move slowly and methodically, not just sprint around corners then hold down the trigger whilst jumping around.

A fantastic indie FPS. Imagine if Counterstrike and Arma 2 had a baby and you get this title. It brings a deep and hardcore tactical experience while staying accessible to the less "hardcore" gamer. What a clunker. People will buy anything that has the "indie game" or "early access" sticker to it these days, because they are fed up with the crap the big companies keep churning out. Can't tell much about this game because it doesn't work at all. Servers are crashing all the time, so it's not really possible to play full round. It looks like early alpha state! Avoid that in all costs for now. Maybe few updates will fix something.

I made this account just so I could leave this review. More people need to be playing this game because it is incredible! The maps are perfect and provide good strategic cover and the game itself really promotes teamwork. The game modes are great and definitely feel like a breath of fresh air after playing all of the mainstream shooters out there. It might take a few rounds to get the hang... [Expand](#)

I'm a long-time battlefield player and this game offers something that battlefield just simply can't do. It has the fluid play and powerful-feeling weapons of battlefield, with the tight gameplay of something like counter-strike, with the palm-sweating intensity of something like arma. The game modes are new twists on old favourites and really stand out. To be honest I was expecting... [Expand](#)

Insurgency is great in what it does, being like expanded Counter-Strike for competitive players. Unfortunately Battlefield has already corrupted me with its unlocking and achievements and... [May 2014]

After a long time a military shooter that is not pretentious, and that scores with emphasis on both hardshell mechanics and tactics/feel. Maybe there could have been many more gaming modes along with maps.

Insurgency is a rich and deep tactical first person shooter. Something is still missing but that something isn't gameplay or teamwork.

Forget about fast-paced shooters and frenetic action. This one relies on a team-based mechanic, where every move should be planned. There's room for improvement when it comes to the visuals and the bullet-detection system, but still it is a very recommended choice.

If you're sick of the run and gun nature of Call of Duty but find the simulation aspects of something like Arma a bit too daunting, Insurgency is the perfect middle ground, and a supremely enjoyable multiplayer experience.

The steep learning curve hides a well-crafted FPS, best suited for those who like tactics and real teamwork more than fragfests.

A Half life 2 mod mainly founded on teamwork and realism, and in cooperative playing you'll probably find its best qualities.

Insurgency is a breath of fresh air that stands apart from the shooter duality of Battlefield and Call of Duty. It rewards patient play and encourages teamwork, with satisfying results for players who don't give into the temptation of taking a run-and-gun approach.

There may be prettier and more heavily populated first person shooters, but few reward teamwork as well as Insurgency.

Insurgency is a multiplayer tactical and highly realistic shooter, far away from the prevailing and more friendly patterns of Call of Duty and Battlefield, and therefore not suitable for everyone. The maps are not the best and the enemy AI in co-op would need some adjustment, but other than that Insurgency works pretty well.

I can't remember when I cursed that much while playing a multiplayer shooter. It is tactically challenging, but suffers from dreary maps and lack of modes.

Realistic and for dedicated players this is a good but hard multiplayer shooter. Death comes early and often in Insurgency's universe.

Those tired of the main stream Michael Bay FPS offerings can try Insurgency in confidence, with the knowledge they're about to play a different brand of FPS.

Insurgency is a game that doesn't have any big problems but rather it has a bunch of little ones that culminate.

It's slow, and methodical, and there isn't a grindable unlock or weapon crate to be found. It attempts to make you think about every step you take and every slight weapon tweak, but the odd hitboxes and frustrating lack of saved loadouts undermines some of the good work.

Insurgency is going to win fans for its gameplay. The action is highly competitive and focused. It brings me about as close to a real gunfight as I'll likely ever want to get.

10 years ago this game would have been lost in a crowd of its brethren — back then, everyone had a game with dusty streets, Saddam's portraits and AKs. Today, serious first-person shooters like Insurgency are a rare beast, so give it a chance even if it's far from perfect.

Intense tactical encounters filled with fire-fights and flying bodies prove thrilling enough to make it easy to look beyond Insurgency's less impressive visual design. The team dynamic and unique squad system inject something different into the mix too, offering match after match of absorbing cooperative killing that proves good looks aren't everything.

 The things that Insurgency does well can already be found in its original Source mod form while the new changes are not substantial enough to really make the game something worth trying out unless you're completely wet behind the ears or looking to scratch an Insurgency itch.

 If you don't mind fighting over the same cluttered iraqi streets and desolate afghan hills that you've seen a hundred times before, Insurgency brings enough hardcore sensibility and competent execution to stand out from the other multiplayer shooters. The old-school gameplay combined with updated mechanics are a breath of fresh air in a genre crowded with games that don't understand that failure can still be fun.
